But here sits the Onkyo TX-SR, with a quid price point. Miracles happen. Even before it's switched the Onkyo on, I can safely say that no. The TX-SR is a channel AV receiver, and Onkyo rates its output at 90 watts per channel. Theoretically, the benefit of having onboard decoding is that HD DVD and Blu-ray players could send these soundtracks to the receiver to be decoded, instead of the players needing onboard decoders themselves.
