

car seat instructions for newborn

The Carry Handle has four positions: the carry position, a mid-storage position, a storage position and the non-rocking position.

To adjust handle position

- Depress the two buttons located on the handle just above the connection to the Car Seat shell to release the handle.
- Slowly rotate the handle to the desired position. The buttons should pop out and the handle should automatically lock into the new position. (Fig. 27-1)
- Before lifting the Car Seat, push on the handle to check that both sides of the handle have locked into the Carry position.
