

k tan instructions

ADVENTURE POSITION

△ Read and follow Instructions and Warnings before placing child in Baby Carrier.
Continue below after following instructions 1-5 for Hug Position:

6 Hold your baby securely against your body facing outward.

7 Take the inner loop (the one still laying diagonally across your torso), and place it between your baby's legs and pull it over baby's shoulder.

8 Place your arm through the outer loop hanging at your waist, pull it up between your baby's legs and over your baby's other shoulder and onto your shoulder.

9 Adjust both layers of fabric between your baby's legs so that they form a comfortable and secure seat for your baby. The carrier should now fall across both your shoulders, your baby's shoulders, your baby's chest and between baby's legs.

10 Reach behind your back and slide the support band down so that the loops cross at the center of your back for optimal back support.

11 Tie sash tightly around your waist and your baby for extra security for your baby and additional back support for you. Sash may be tied in a single knot at your front, side or back.

12 Adjust the fabric on your shoulders so that it feels comfortable. Now you and your baby are ready to go!

Warning: The Adventure Position may only be used when your baby is able to hold his/her head upright unassisted.

Sash must be used in Adventure Position so that your baby is secured properly in the Carrier.
