Comfort Glow PROPANE/LP GAS DECORATIVE PATIO FIRE

INSTALLATION

Continued

4. Check all joints of gas supply piping system. Apply mixture of liquid soap and water to gas joints. Bubbles forming show a leak.
5. Correct all leaks at once.
6. Reconnect unit and equipment shutoff valve to gas supply. Check reconnected fittings for leaks.

Test Pressures Equal To or Less Than 1/2 PSIG (3.5 kPa)

1. The appliance must be isolated from the gas supply piping system by closing its individual manual shutoff valve during any pressure testing of the gas supply piping system at test pressures equal to or less than 1/2 psi (3.5 kPa).
2. Pressurize supply piping system by either using compressed air or opening propane/LP supply tank valve.
3. Check all joints from propane/LP supply tank to equipment shutoff valve (see Figure 6). Apply mixture of liquid soap and water to gas joints. Bubbles forming show a leak.
4. Correct all leaks at once.

Figure 5 - Equipment Shutoff Valve

Figure 6 - Checking Gas Joints

Pressure Testing Appliance Gas Connections

1. Open equipment shutoff valve (see Figure 5).
2. Open propane/LP supply tank valve.
3. Check all joints from equipment shutoff valve to supply hose. Apply mixture of liquid soap and water to gas joints. Bubbles forming show a leak.
4. Correct all leaks at once.

SETUP

Your Comfort Glow Patio Fire is designed to operate with lava rock piled in and around the burner, and refractory logs placed on top of the lava rock.

Carefully pour supplied lava rock into basin to cover the burner. Be sure that the burner and burner ports are covered completely by lava rock to better disperse the flame and to create a more natural looking fire.

CAUTION: Place lava rock carefully. Be careful not to damage the burner, ignitor electrode, or thermocouple when adding the lava rock.

Place the six refractory logs on top of the lava rock. The arrangement is left to your personal preference. Try different placements to achieve your desired flame pattern.

Note: Sooting on the logs is natural. You may clean with a soft bristle brush.

WARNING: Allow logs and lava rock to cool completely before handling or rearranging logs.

WARNING: Solid fuels shall not be burned in this gas fireplace.

BATTERY INSTALLATION

Your Comfort Glow Patio Fire uses an electronic ignitor which requires one AA alkaline battery (not included). The battery compartment is located in the ignitor module behind the ignitor button.

To install the battery into the ignitor:

1. Locate the ignitor button on the control panel (see Figure 6).
2. Rotate the ignitor button counterclockwise to remove.
3. Install a fresh AA alkaline battery into the ignitor module, positive terminal first.
4. Replace button by rotating clockwise. Tighten finger tight. Do not overtighten.

Note: Your fire pit may be lighted using a match (see Lighting Instructions, page 7).
